

Body Temperature Screening

Non-Contact Thermal Sensor

- Reduce the time of taking everyone person's temperature
- Able to reduce the man power to standby at monitoring area
- Prevent the chances of infection to be pass on from person to person
- Alarm will sound when it detects a person with temperature > 37.3°C
- No software / license required

Model: TS-01F

Specification

Measurement perspective : 110 degree

Measurement range: 10 ~ 80 cm

Measurement temperature range: 20~38.5°C

Working temperature range: 20~30°C

Data update frequency: 4 fps

Temperature error: ±0.7°C

Supply voltage: 5~12V

Protocol: 2.4G WiFi

SD card storage (up to 32GB) format: csv

Temperature: 38°C
WARNING

[Application]

- Schools, Government institutions, Offices or anywhere with large crowd and constant human interaction

NP-NE01

NP-TEM01
Simple machine type, portable, can put on shelf

NP-TEM02
Thermometric with auto-sterilizing machine

NP-TEM03
Infrared Temperature Screen for big spaces

NP-TEM04
Hand held infrared scanner, can be connected to computer and large screen
